Summary:

Today, all assigned interns (except one currently on exam leave) successfully uploaded their completed tasks to their GitHub repositories. Under my supervision, they began their learning journey on the Scrimba platform with the HTML basics course.

They have now completed the HTML portion of the course. This foundational knowledge is crucial as it forms the base of front-end web development. Each intern actively participated, followed the lessons, and practiced the concepts covered in the modules.

As the next step, I will assign them a practical project built entirely using HTML. This project will help reinforce the concepts they've learned and provide them with an opportunity to apply their skills in a structured, real-world scenario.
