

DAILY Report Front-End (React.js)

Date: July 31, 2025
Internship Track: Front-End (React.js)
Team Lead: Ali Hyder
Week: 6
Day: 3

Daily Summary (Team-Wise)

Overall Attendance: 10 out of 12 interns marked present today as per check-in screenshot.
Response & Activeness: Interns showed active participation, asked relevant questions, and performed well while learning about React's state and event handling capabilities.

Common Questions Asked:

- What are controlled and uncontrolled components in React?
- Can we update multiple state variables in one function?
- How to prevent default form submission behavior?
- How does event delegation work in React?
- Best practices for state structure in large components?

Issue Resolution:

- Demonstrated event binding techniques and best practices. - Explained and implemented form handlers using onSubmit. - Debugged state-related rendering issues. - Helped interns separate concerns between state and UI.

General Observations:

- Interns displayed solid understanding of interactive component design. - Code written today was cleaner and more modular than previous days. - Peer assistance during coding activities was evident and encouraged.

Suggested Improvements

- Focus on breaking down complex forms into smaller components. - Continue refining event handler functions with more edge cases. - Review state immutability and updates using spread/rest syntax.
