DAILY Report – Front-End (CSS)

General Report Info

Field	Description
Date	July 9, 2025
Internship Track	Front-End (CSS)
Team Lead	Ali Hyder
Week	Week 3
Day	Day 3

Daily Summary (Team-Wise)

Category	Remarks
Overall Attendance	12 out of 12 interns attended the session
Response & Activeness	Interns actively explored CSS transitions and animations through hands-on tasks and examples

Common Questions Asked

• How to create smooth hover transitions for buttons?
• What's the difference between `transition` and `animation` properties?
• How to loop animations infinitely without performance issues?

Issue Resolution

• Demonstrated syntax for `transition-property`, `duration`, and `timing-function`
• Explained `@keyframes` and how to control animation flow
• Guided interns through interactive animations using hover and keyframe triggers

General Observations

• Interns showed creativity in building animated cards and buttons
• Many experimented with bounce, fade, and slide effects
• Some confusion with timing functions was resolved through examples

Suggested Improvements

• Explore easing functions like `ease-in-out`, `cubic-bezier()` for better animation control
• Use animations subtly to avoid distraction in UI
• Continue practicing chaining transitions with multiple properties

Individual Intern Tracking

No	Name	Present	Task Submitted	LinkedIn	GitHub	Queries Asked	Grade (10)
1	Hamza Rafique	✓	✓	✓	✓	Asked about hover animations for icons	10
2	Ayesha Abid	✓	✓	✓	✓	Wanted to add animation delay	10
3	Ayaz	✓	✓	✓			9.0
4	Saliha Mehar	✓	✓	✓	✓	Needed help looping keyframe animation	9.5
5	Zainab	✓	✓	✓	✓		10
6	Sardar Manzar Ali	✓	✓	✓	✓	Wanted to sync multiple element animations	9.5
7	Yasal Qamar	✓	✓		✓		10
8	Muhammad Farooq Sajid	✓	✓	✓	✓	Confused about `animation-fill-mode`	9.0
9	Fatima Wajid	✓	✓	✓	✓		10
