DAILY Report Front-End (JavaScript)

General Report Info

Date: July 24, 2025

Internship Track: Front-End (JavaScript)

Team Lead: Ali Hyder

Week: 5

Day: 4

Daily Summary (Team-Wise)

Overall Attendance: 12 out of 12 interns marked present today as per check-in screenshot.

Response & Activeness: Interns were engaged in understanding function declarations, expressions, arrow functions, and hoisting behavior.

Common Questions Asked

- What is the difference between function declaration and function expression?

- When should we use arrow functions?

- How does hoisting affect function usage?

- What is the purpose of `return` in functions?

- Can functions be passed as parameters?

Issue Resolution

- Demonstrated all types of function definitions with examples.

- Explained scope, return values, and hoisting through code.

- Compared regular vs. arrow functions and their behavior with `this`.

- Gave real-use examples for callbacks and functional programming basics.

General Observations

- Interns quickly grasped arrow function syntax.

- Many questions centered on scope and return values.

- Some interns experimented by converting traditional functions into arrow ones and explored reusability.

Suggested Improvements

- Practice writing functions with parameters and default values.

- Explore anonymous functions and callbacks with event listeners.

- Revise hoisting rules for functions vs. variables.

- Use functions for modularizing code in small projects.
